

## DIVIDERS TO PALLET BOX 1200X800

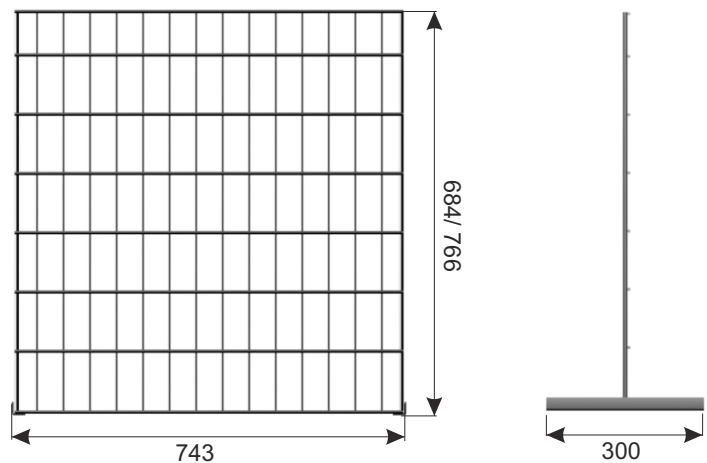

A functional divider made of wire can be used to divide the pallet box into two separate chambers, without impediment of the access by tilting the frame from the front. This allows two different products to be separately stored and transported within a single box.

**Standard finish:** zinc plated + lacquer.

**Divider belongs to the additional equipment and is adapted to assembly to:**

- pallet box (divider H 766 is recommended)
- pallet box Light I (divider H 684 is recommended)
- pallet box Light II (divider H 684 is recommended)

Divider H-766  
with pallet box

Divider H-684  
with pallet box LIGHT I

Divider H-684  
with pallet box LIGHT II

PRODUCT NAME	FINISH	INDEX
