DAMIX

We offer customized solutions for display and sales products – including various types of display stands, interior fixtures, shelving solutions (adapted to different systems), hangers, hooks, and other accessories.

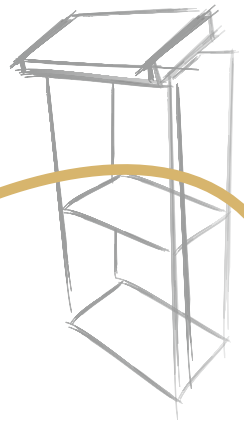

We project displays for the food retail sector, drugstores, clothing stores and gas stations.

This brochure presents only a selection of our completed projects, providing a glimpse into our production capabilities.

Most of the designs are proprietary and protected projects.

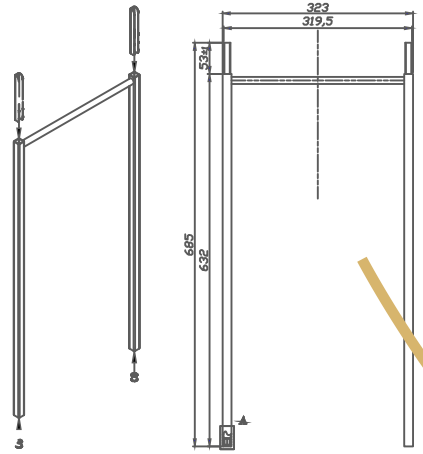

FROM CONCEPTION TO REALIZATION

Original Concept or Client Vision Fulfillment

We design products independently or we support our clients throughout the entire process - from the initial idea to final production.

We work both with end clients and design studios.

Technologically optimal manufacturing solutions

Our team of experienced engineers and technologists develops products from scratch or manufactures components based on provided technical drawings, depending on the client's requirements.

The design process is supported by modern software tools.

Production

We specialize in the production of metal.

Thanks to close collaboration with trusted partners, we work with a wide range of materials, combining metal with elements such as wood, plexiglass, or plastic.

We meet to our clients' expectations by offering a wide range of colors and finishes, including powder and galvanic coating.

Our robotic workstations and CNC machines enable efficient execution of both small and large-scale orders while maintaining high-quality standards.

Final Result

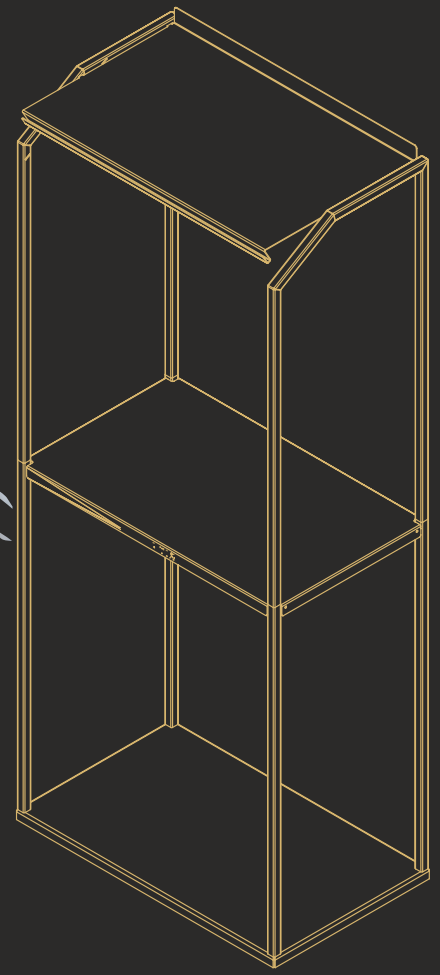

We adapt to the client's needs and expectations.

We produce display solutions for various environments, including the food industry, drugstores, clothing stores, and gas stations.
