ACCESSORIES

FOR PALLET BOXES

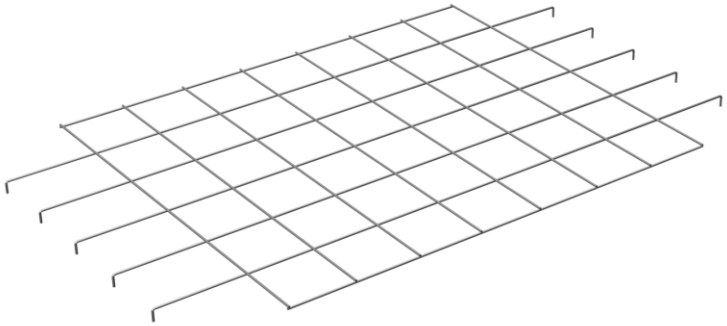

Divider

for pallet box 1200x800

A functional divider made of wire can be used to divide the pallet box into two separate chambers, without impediment of the access by tilting the frame from the front. This allows two different products to be separately stored and transported

DIMENSIONS:

PARAMETERS:

Technical data:
Divider belongs to the additional equipment and is adapted to assembly to:
- pallet box (divider H 766 is recommended)
- pallet box Light I (divider H 684 is recommended)
- pallet box Light II (divider H 684 is recommended)

Standard coating: galvanized zinc + lacquer

Horizontal divider

for pallet box 1200x800

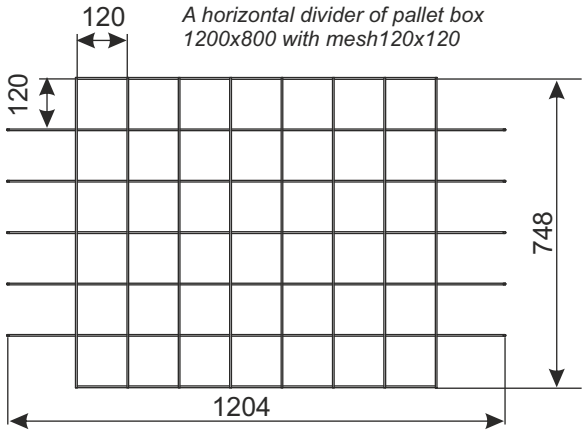

The example of using

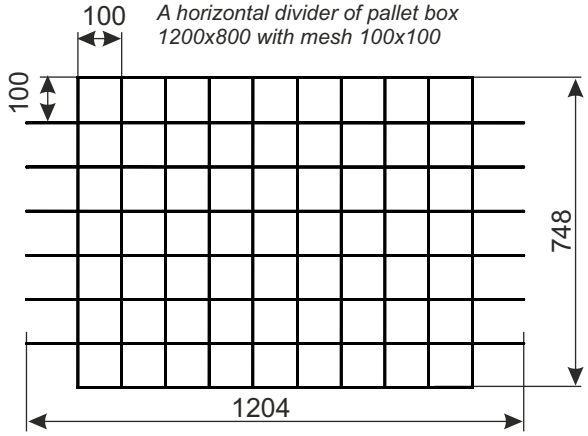

A horizontal divider made of wire allows you to put goods in form of rolls in a vertical position to protect them from falling over. In order to a better stability of a vertical position of goods, it is recommended to mount two horizontal dividers in a pallet container – the first on the bottom of pallet container, the second in the upper part of pallet container.

The divider is an additional equipment and it is adapted for mounting on product:
- pallet box1200x800

DIMENSIONS:

A horizontal divider of pallet box 1200x800 with mesh120x120

A horizontal divider of pallet box 1200x800 with mesh 100x100

PARAMETERS:

Standard coating: galvanized zinc + lacquer
