PALLET BOX

1200x800

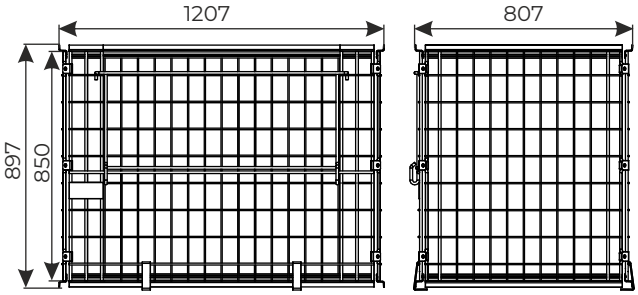

This pallet box together with the wooden pallet creates a full value container, making it possible to store and transport loose goods, using of the pallets.

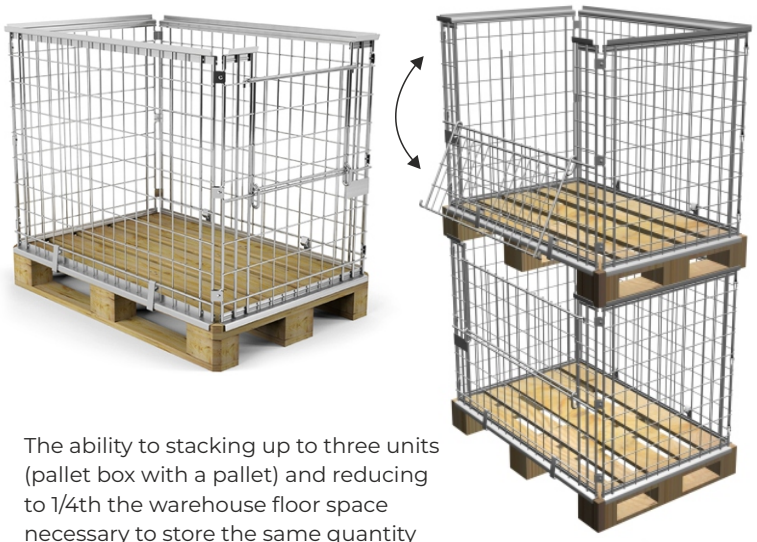

During transportation it is possible to stack two pallet boxes with pallets (total height of 2040 mm), allowing for optimal utilization of the vehicle's cargo carrying capacity

The ability to place substantial loads within a single box means that it is not only useful as a container for loosely packed lightweight goods, but also as a stable system for organizing heavier products within a small amount of floor space, maintaining easiness of their movement.

Its small dimensions after folding (thickness of only 90mm) means that when a box is not being used, it does not take up excessive warehouse space.

DIMENSIONS:

The ability to stacking up to three units (pallet box with a pallet) and reducing to 1/4th the warehouse floor space necessary to store the same quantity of goods.

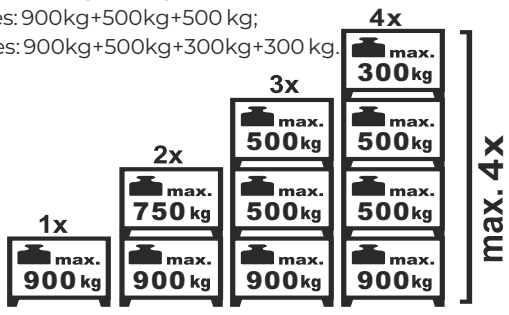

An half-opened frame on the front or side wall allows for easy access to the goods stored inside the box.

ADDITIONAL EQUIPMENT:

Divider H-766
(to pallet box 1200x800)

PARAMETERS:

Technical data: The structure of the box is made of steel wires and spot welded mesh. From the bottom and the top it is finished with z-profiles. Frame opens to the short or long side.
Standard coating: galvanized zinc + lacquer
Load capacity: (using europallets and when equally loaded)
1 pallet box: 900kg;
2 pallet boxes: 900kg+750kg;
3 pallet boxes: 900kg+500kg+500 kg;
4 pallet boxes: 900kg+500kg+300kg+300 kg.
