FOLDING ROLLCONTAINER FOR LOGISTIC

KL-SL-1200x800x1950

DIMENSIONS:

PARAMETERS:

Technical data:

Structure made of closed profiles, mesh made of steel bars. Base made of plywood (anti-slip, waterproof, double-sided foiled), fitted with 4 swivel castors.

- The construction of container allows for its folding and nesting of folding containers, which reduces the storage space for unused containers.
- Two wheel lock systems - directional lock on two wheels (allows stable guidance when container is heavily loaded) and travel lock acting as brake to prevent container from moving on its own.
- Handle on the side of the container - for easier transport of the container.
- Straps with safety fasteners - 3 pcs. - securing the goods against falling out of the container.
- metal plate with a clip - allows you to attach a sheet of paper.
- metal board on the right side with information about the safe use of the container.

Wheels: Ø 160 mm

Standard coating:

zinc plated + lacquer

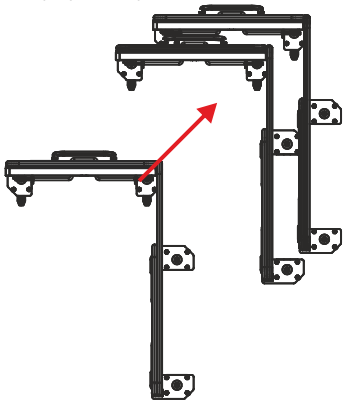

Total loading: 400 kg

Nesting of folded containers:

Nesting of folded containers (top view)
